

Certificate Support in esp8266ndn Library

- esp8266ndn: library for developing NDN app on ESP8266/ESP32 MCU
 - esp8266ndn is used in building sensing deployments at Memphis & NIST.
- esp8266ndn supports HMAC and EC signing and verification, but application must provide uncompressed kit bits.
- This project: add NDN Certificate v2 decoder and encoder.
 - It paves the way of implementing trust schema, ndncert-client, and secure device onboarding in the future.
- Requirement: must have ESP8266 or ESP32 hardware.
